Art Unit: 1732

DETAILED ACTION

1. The rejection of claims 1-3, 5-9, 14-18 and 21-26 under 35 USC § 102(b) as being anticipated by either Weng et al (U.S. Patent 5,762,857 A) or GB 1,244,753 A set forth in the previous Office Action (mailed on 20 January 2006) is withdrawn.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-3, 5-9, 14-18 and 21-26 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6 and 16-24 of copending

Art Unit: 1732

Application No. 10/325,140. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the reasons of record.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claims 1-3, 5-9, 14-18 and 21-26 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 10/694,420. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the reasons of record.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1732

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-3, 5-9, 14-18 and 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 1,244,753 A in combination with Snow et al (U.S. Patent 2,863,493 A).

GB 1,244,753 A (see the entire document, in particular, pages 1-9; Examples) teaches a process of, and apparatus for, making a nonwoven web as claimed, Except that GB 1,244,753 A does not explicitly teach that a non-contact deflecting device comprises an air jet deflector providing discrete jets of air, which is taught by Snow et al (see the entire document, in particular, col. 1, lines 57-62; col. 6, line 69 to col. 7, line 15) and would have been obvious to one of ordinary skill in the art at the time the invention was made in GB 1,244,753 A in view

Art Unit: 1732

of Snow et al principally in order to provide a nonwoven web having a desired and uniform thickness.

Response to Arguments

8. Applicant's arguments with respect to claims 1-3, 5-9, 14-18 and 21-26 have been considered but are moot in view of the new ground(s) of rejection.

9. Applicant's arguments with respect to dependent claims 5, 6, 8 and 26 have also been considered, and these limitations would have been obvious to one of ordinary skill in the art at the time the invention was made in GB 1,244,753 A in view of Snow et al principally in order to provide a nonwoven web having a desired and uniform thickness.
